INTRODUCTION

It is becoming a common skill for every European to be able to communicate at an international level of language competency. However, in case of the hearing impaired it is not very easy to gain the aforementioned skills. For deaf people, gaining competency with a foreign language comes in third position in the order of precedence since their national sign language is first and second is learning the written form of their national spoken language.

This resulting situation is that international communication for deaf persons must employ a different sign system; one that is supranational and generally accepted by the international deaf community. Such a system, through which international communication runs, has only been in existence for a few years, but is slowly being integrated into the international community for the deaf. The international sign system is not considered as separate from the original sign system, but a rather complex series of international signs which borrows grammar from the different national sign languages. Therefore good knowledge of the national sign languages is the primary requirement in order to gain competency in communicating in international sign language.

The civil association EFFETA fully realizes the need to spread and further educate people and organizations in the area of international sign in Slovakia given that it is an innovative form of education not only for deaf people, but for interpreters of sign language and at the same time hearing persons who support this form of communication. EFFETA has recently published this dictionary which contains the most frequently used international signs in use in the world today in collaboration with renowned interpreter of international sign, Gerdinand Wagenaar from the Netherlands in order to prepare and deliver world class education in the field of international sign language. We have drawn from Gerdinand's expertise in international sign expression to build the vocabulary that make up this dictionary. We have managed to match a Slovak and an English meaning to every sign in order to establish an international standard for this dictionary. This publication is a result of mutual and equal cooperation from both hearing and deaf people and should serve as an aid in the process of learning international sign vocabulary from both the hearing and deaf perspective. We hope that thanks to this publication you will be able to succeed in overcoming communication barriers with the deaf community in an international context.

ÚVOD

Vedieť komunikovať na medzinárodnej úrovni sa v súčasnej dobe stáva bežnou výbavou jazykových kompetencií každého Európana. Avšak v prípade osôb so sluchovým postihnutím získať spomínané zručnosti nie je úplne jednoduché. Cudzí jazyk v ponímaní nepočujúcej populácie stojí až na treťom mieste v poradí osvojovania si jazykových kompetencií, nakoľko prvým jazykom je u prevažnej väčšiny nepočujúcich národný posunkový jazyk a až druhým osvojovaným jazykom je písaná forma národného hovoreného jazyka.

Z uvedeného vyplýva, že medzinárodná komunikácia u nepočujúcich zákonite prebieha prostredníctvom iného posunkového systému, ktorý je nadnárodný a nepočujúcimi všeobecne akceptovaný. Tento systém, prostredníctvom ktorého prebieha medzinárodná komunikácia, sa šíri len niekoľko rokov a pomaly sa integruje do medzinárodnej komunity Nepočujúcich. Medzinárodný posunkový systém nie je považovaný za samostatný originálny posunkový jazyk, ale ide o komplex medzinárodných posunkov s použitím gramatiky národného posunkového jazyka. Preto ovládanie národného posunkového jazyka na veľmi dobrej úrovni je prvoradou podmienkou pre získanie kompetencií komunikovať v medzinárodnom posunkovom systéme.

Občianske združenie EFFETA si plne uvedomuje potrebu šírenia a ďalšieho vzdelávania v oblasti medzinárodných posunkov, nakoľko ide v podmienkach Slovenska o inovatívnu formu vzdelávania nie len samotných nepočujúcich ale súčasne aj tlmočnikov posunkového jazyka a počujúcich nadšencov tejto formy komunikácie. Dostáva sa vám do rúk knižný slovník, ktorý obsahuje medzinárodné posunky, ktoré sa najčastejšie vyskytujú v medzinárodnej posunkovej komunikácii Nepočujúcich na svete. Na príprave a realizácii vzdelávania v oblasti medzinárodných posunkov organizácia už dlhšie spolupracuje s tlmočnikom medzinárodných posunkov Gerdinandom Wagenaarom z Holandska. Práve z jeho medzinárodného posunkového prejavu sme prevzali slovnú zásobu, ktorú sme vložili do tohto slovníka. Ku každému posunkovi sme priradili jeho slovenský a anglický význam, aby bola naplnená medzinárodná rovina slovníka. Táto publikácia vznikla vďaka vzájomnej a rovnocennej spolupráci dvoch - nepočujúcej a počujúcej - autoriek a má slúžiť, ako pomôcka v procese osvojovania si medzinárodnej slovnej zásoby posunkov tak ako pre nepočujúcich tak aj pre počujúcich. Prajeme vám, aby sa vám podarilo aj vďaka tomuto knižnému slovníku preklenúť komunikačné bariéry v medzinárodnom kontexte komunity Nepočujúcich.
